It all started with
The Original Stopper®

It all started with a solution to a challenge

Who We Are

Family owned and operated for over 40 years, we take great pride in STI's products and exemplary service. Our entire team works just as hard to make you a satisfied customer as we do to make the world a safer place, one product at a time.

What We Do

STI manufactures protective polycarbonate covers, enclosures, push buttons, wire cages and wireless alarms to help prevent theft and vandalism to important fire and safety devices. Covers and cages protect: detectors, lights, manual pull stations, and much more. Alarms protect: fire extinguishers, exit doors, etc. Many options and variations of products are available to protect the things that protect you.

Where We Came From

The STI story begins over four decades ago with a challenge made by a suburban Detroit school administrator who wanted to stop false fire alarms. Our Founder, Jack Taylor, used his expertise in security systems to invent the original Stopper® pull station protector. Today, STI has hundreds of innovative products that help make homes, businesses and workplaces around the world safe, smart and secure.

Rely on STI!®

TABLE OF CONTENTS

Universal Stopper®

DESIGN
Protective cover with horn. Prevents false fire alarms, without hindering legitimate operation of a manual pull station in the event of an emergency.

ELECTRONICS
95/105 dB self-contained alarm draws immediate attention to the area. Available with or without horn, powered by an included battery.

Low profile models with a horn (STI-14000 series) flash and sound.

INSTALLATION
Quick and easy protection in minutes. Can accommodate flush or surface mount applications. Gaskets included.

CONSTRUCTION
Tough, clear UV-stabilized polycarbonate material. Housing can take the severest knocks preventing vandalism or accidental damage to the manual pull station.

IN CASE OF FIRE – LIFT COVER
ACTIVATE FIRE ALARM

↑LIFT HERE↑

c (UL) us

Indoor/outdoor polycarbonate cover helps stop false fire alarms without restricting legitimate operation of pull stations. It is ideal for schools, hospitals, nursing homes, stores, hotels and public buildings of almost every kind.

Environmental Enclosures

DESIGN
Protective enclosure with heat. Protects a wide range of devices, components and sensitive units from vandalism and accidental damage as well as weather, dirt, dust and grime.

ELECTRONICS
With or without heat and AC. Heater offers three thermostats. Radiant heat plate prevents LCD from becoming sluggish or freezing. Operates on 12, 16.5, or 24 VAC/VDC.

INSTALLATION
Several mounting options available. With or without lock. Mounting hardware and gaskets included.

CONSTRUCTION
Tough, clear UV-stabilized polycarbonate material. Powder coated metal helps protect against corrosion.

With STI's environmental enclosures you can reduce costly equipment replacement and repairs, and assure operation of important devices.

Steel Web Stoppers®

DESIGN
These steel cages are designed to protect devices from vandalism and misuse. Designed so there is no interference with the operation of the protected unit.

OPTIONS
Designed for flush or surface mount applications. Where additional security is required from theft or misuse, tamper resistant bits are available.

INSTALLATION
Quick and easy installation, can retrofit and protect units within minutes.

CONSTRUCTION
Constructed of 9-gauge steel wire with corrosion resistant polyester coating or 9-gauge stainless steel wire.

These heavy-duty steel cages are designed to protect smoke detectors, PIRs, exit signs and more from vandalism and misuse, while leaving the devices fully accessible and operational.
